

ST reference

ST Microelectronics created an application note AN819 in 1995:

https://www.st.com/resource/en/application_note/cd00003947-capacitive-discharge-ignition-stmicroelectronics.pdf

It is short but very informative with a lot of diagrams. So it is highly recommended for reading when you are interested in CDI technology.

ST documents

There are a few documents about ignition knowledge published by ST.
